Dear Sir/Madam,

As a young and motivated individual, I am incredibly interested in working with your organisation. I have always aspired to improve the lives of others by designing functional and meaningful solutions. Being intrigued by the ever-changing needs of today's generation, I am committed to pioneer in the advances of technological innovation.

In August 2019, I enrolled at the National University of Singapore (NUS), pursuing a double major in Biomedical Engineering and Innovation & Design and a minor in Financial Mathematics. The school has given me a range of practical capabilities and opportunities to aid the need for this role.

Furthermore, I have engaged in many extracurricular activities and academic projects at NUS. My responsibilities in school include academic projects, teaching assistant roles, and activities within NUS. For two years at NUS, I volunteered as a teaching assistant, tutoring and facilitating classes of over 300 students. In addition, I have taken on numerous internships, not limited to Virtual Reality Game Design to New Product Introduction, at a Biomedical fully automated robotic assembly line. Furthermore, I took on leadership roles, directing and organising initiatives while participating actively in various sports and committees.

As a dedicated and reliable team player, I am committed to delivering exceptional results and supporting my colleagues in achieving our shared goals. My ability to effectively collaborate with others and consistently contribute to the success of team-based projects demonstrates my dedication to being a valuable and supportive member of any team.

I enjoy pursuing personal engineering and design projects in my free time, including building bicycle stands, 3D printing household items, and developing gaming applications. I am confident that my qualifications and professional experiences make me a valuable addition to your team, and I am eager to contribute my skills and enthusiasm to your organisation.

Here is an enclosed copy of my resume for your consideration. I can be reached anytime at lucastay40@gmail.com or by mobile at +6592302698.

Thank you for your time and consideration, and I look forward to hearing back from you.

Yours faithfully,

Lucas Tay Hao Yang
